

**LINK GEN. PERSHING WITH ARMS PARLEY**

Paris Press Suspects His Visit to France Has Hidden Significance

**HERRICK'S SPEECH NOTABLE**

By the Associated Press  
Paris, Sept. 23.—Newspapers of this city have begun to devote much attention to the conference on limitation of armaments and Far Eastern questions to be held in Washington in November, and daily publish editorials regarding the meeting. L'Avenir today asked if the real reason for General Pershing's visit to this country was not to converse with French leaders preliminary to the Washington conference.

The address made by Myron T. Herrick, American Ambassador to France, at the dinner in honor of General Pershing at the Allied Club last night made a notable impression. Mr. Herrick declared America was devoid of ambition, "but was without fear, confidence and her right, but respectful of the rights of others; aiming at justice but never yielding to force in a just cause."

The newspaper Gaulois captioned it "a significant speech by Mr. Herrick." Other newspapers gave it special notice in their reports of the dinner. "L'Avenir," political editor of the Echo de Paris, devoted a column to a discussion of the conference today. "France should consider herself at Washington," he declared, "to a firm defense of our national interests, which can only be affected by certain schemes which are vague and not very formidable, and which no one will readily take to a serious manner. She should let other matters, notably Asiatic questions, severely alone."

Ambassador Herrick, in his speech, also recalled the promise of American aid made by General Pershing on his arrival in France, and declared that the promise was kept. The following is a translation of the speech: "The Minister of War Barthou, in replying to Ambassador Herrick, said: 'Our own countries have but one law—that of justice and liberty. I always have refrained from defending France from unwarranted reproaches. France has given and not very far from it, and she needs to justify herself. France and the United States will never be separated. They have the same ideals of justice and the same conception of the law.'
